**SCARLET**

The new smart display warmer

# SCARLET

Scarlet is our new *heated cabinet* designed to keep food warm.

## Why Scarlet?

The creation of a food display warmer represents our answer to the food market trends, a market where the food-to-go sector has been growing steadily for over a decade.

New technologies and resources make our daily life's rhythm frenetic.

In this sense, eating habits have been changing as well. Customers are always more acquainted with the idea of quick, delicious and ready-to-go meals. For this reason, some of the most growing restaurant chains have been implementing *grab-and-go* equipment in their spaces and creating an environment where the main priority is, not only the quality of ready-to-use meals, but also the celerity of the service.

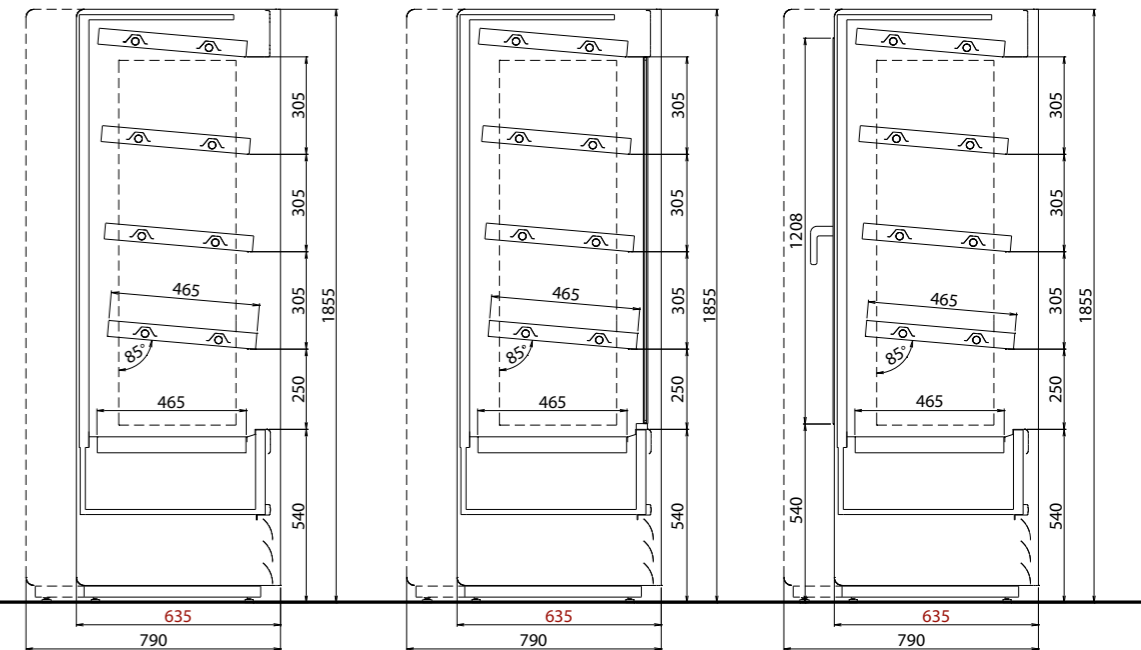

**Scarlet** has thus been born in order to satisfy those retailers who are in need of a cabinet that, as all Fogal products, can be personalized in different ways depending on the type of food and on the displaying needs. A versatile product, equipped with excellent technology that keeps prepared meals warm and allows the final customer to a quick and safe purchase experience.

### main features:

- It perfectly adapts to your furniture, as it can be customised with special external claddings and options (stainless steel basket, castors, etc.)
- It can be combined with our refrigerated cabinets, as it follows the same aesthetic line
- Heating system based on quartz halogen lamps
- The operating principle follows the three principles of the thermodynamics: radiation, thermal conduction and convection
- No forced hot air circulation
- Independent shelves thermal control
- Guaranteed temperature 65°C
- PLC controlled system
- Two-lines multi-colored LED digital control panel display. Intuitive and pleasant touch screen interface (integrated general On/Off key)
- Single phase supply voltage 230v ac
- Safety manual reset thermostat for the automatic switching off of the system
- Lamps operation check at system start-up and automatic malfunction warning signal
- Self recording of system operating hours
- Reduced operating costs thanks to smart power

## SCARLET SLIM / SCARLET

Scarlet slim / Scarlet

Scarlet slim / Scarlet  
hinged doors

Scarlet slim / Scarlet  
rear loading doors

The tolerance value of the height dimension is of +/- 5 mm

The internal capacity of the two versions remains unchanged. In order to guarantee aesthetic continuity between our standard cabinets and Scarlet, we have created the 790mm version only by increasing the end panels' depth.
